Company Description

Founded in 1988 and headquartered in France and Germany, Atos is a leading business in digital services, with annual revenues of more than EUR 10 billion. The company employs around 100,000 people in 72 countries. Atos operates under the following main brands: Atos, Atos Consulting, Atos Worldgrid, Bull, Canopy, Unify, and Worldline. These provide Consulting & Systems Integration services, Managed Services & BPO (Business Process Outsourcing), cloud operations, Big Data & Cybersecurity solutions, as well as transactional services through Atos' subsidiary Worldline, the European leader of payments and transactional services. With its deep technological expertise and industry knowledge, the Group works with clients across different business sectors: Defense, Financial Services, Health, Manufacturing, Media, Utilities, Public sector, Retail, Telecommunications, and Transportation. Europe is still the Group's main operational base, generating 81% of the company's total revenues in 2015.

Industry Drivers

The IT services industry helps companies run their businesses efficiently by enabling the outsourcing of business processes or by developing and integrating software applications. Strong growth for internet services, which include digital media, online shopping, social interaction platforms and cloud computing, is driven by increasing global internet penetration and by the move towards mobile internet usage. To protect client privacy and secure information technology, a rigorously enforced code of conduct covering access to confidential data is required. Effective innovation and knowledge management are key contributors to business success. Therefore, attracting and retaining qualified staff is crucial. In addition, the increased outsourcing of IT services to lower cost requires exceptional quality management practices. The industry's main environmental impacts stem from data center operations and travel. These can be addressed by substituting travel with conference calls and other collaboration tools, and investments in more efficient data centers, which ideally are operated with renewable energy. In addition, IT and internet service providers can use information technology applications to help their customers reduce their environmental impact.

Sustainability Performance

Atos has been named a sustainability leader, signaling that it is well-equipped to tackle the most demanding sustainability challenges of the 21st century. Its thorough and state-of-the-art environmental reporting reflect the solid climate strategy that it has in place. In 2015, 88% of all electricity used in its strategic data centers was green electricity, a 24% increase from 2014. Alongside its excellent environmental performance, the company also exhibits top notch diversity policies, and 45% of its Board of Directors are women. Atos helps its clients address their business and environment challenges by enhancing the contribution of the IT sector towards a low-carbon economy. The company's carbon-neutral hosting services enable its ICT intensive clients to drastically reduce their scope 3 emissions. These and other smart, sustainable solutions provided by Atos make up a significant portion of the company's revenues. As a result, Atos sets a unique example in IT services & Internet Software and Services.
