### Company Description

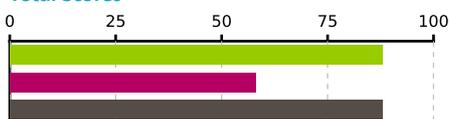

Hewlett Packard Enterprise (HPE) is an American multinational enterprise information technology company based in Palo Alto, California. It was founded on November 1, 2015 as part of a splitting of the Hewlett-Packard company. HPE is a business-focused organization with four divisions: Enterprise Group, which works in servers, storage, networking, consulting and support; Services; Software; and Financial Services. The Company makes IT environments more efficient, productive and secure, enabling fast, flexible responses to a rapidly changing competitive landscape. HPE is a truly global organization, with offices in 46 countries and employing over 287,000 employees.

### Industry Drivers

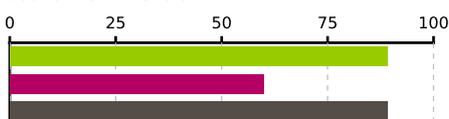

The computers & peripherals and office electronics industry is characterized by disruptive innovations, vertical integration of the supply chain, and mass production of electronic hardware. Effective innovation management is necessary to mitigate the risk from technology disruption. And to ensure continuous innovation, the right set of skilled people is necessary. The effective implementation of environmental standards and monitoring of supplier compliance in areas such as the use of hazardous materials and fair working conditions in emerging economies are particularly relevant for the industry. Shorter product life cycles and the ubiquity of electronic devices around the world have resulted in high disposal volumes and increased overall energy consumption by IT hardware. To address the issue of energy efficiency, companies must consider energy consumption over the entire product life cycle when designing new products. Electronic waste can be reduced through weight reductions, modular design, and take-back programs. Furthermore, digitalization and centralization through cloud applications create new business opportunities, which enable customers to achieve operational efficiency gains, contributing to both cost savings and environmental footprint reduction.

Sustainability Performance

HPE has continued Hewlett-Packard’s legacy of strong sustainability performance, as it continues to prioritize economic, environmental, and social aspects in its business strategies. The company has performed exceptionally well in the areas of labor practices and human rights, as well as in privacy protection, underpinning its commitment to employee and customer welfare and human rights. Innovation management is another strength of the company, and the new strategic direction of the company with and intensified focus on services and consulting allows the company to compete on new fronts. Other areas such as product stewardship and supply chain management, that historically were areas of strength for Hewlett-Packard, form a solid foundation for the company to continue to build on its own unique strengths and set new ambitious goals.
