Company Description

Konica Minolta Inc engages in business technologies, industrial, and healthcare businesses in Japan, the United States, Europe, China, and Asia. The company develops, manufactures, and sells a variety of printing systems. It also offers healthcare systems, such as digital X-ray diagnostic imaging systems. In addition, the company provides optical systems for industrial use. Further, it offers optical planetariums, digital full-dome systems, and full-dome shows; and manages and operates planetarium facilities. The company was founded in 1873 and is headquartered in Tokyo, Japan, and had approximately 44,000 employees in 2016.

Industry Drivers

The computers & peripherals and office electronics industry is characterized by disruptive innovations. In addition, cybersecurity is a deepening concern across the entire industry. Effective innovation management is necessary to mitigate emerging risks, which in turn requires the right people with the right skill mix. Successful implementation of environmental standards and monitoring of supplier compliance in areas such as the use of hazardous materials and fair working conditions in emerging economies are particularly relevant. Shorter product life cycles and the ubiquity of electronic devices around the world have resulted in increased overall energy consumption by IT hardware as well as in high equipment disposal volumes. To address the issue of energy efficiency, companies must consider energy consumption over the entire product life cycle when designing new products. Electronic waste can be reduced through weight reductions, modular design, and take-back programs. Furthermore, digitalization and centralization through cloud applications create new business opportunities, which enable customers to achieve operational efficiency gains, contributing to both cost savings and environmental footprint reduction.

Sustainability Performance

Led by its clearly defined six material issues (environment, social innovation, customer satisfaction and product safety, responsible supply chain, human capital), Konica Minolta has proven its sustainability leadership. Konica Minolta's environmental performance is driven by their "Carbon Minus" vision for 2050. They also put strong emphasis on green products, introducing an original Green Products Certification System to drive the creation of environmental value that matches business and product characteristics. Their focus on social innovation, with five Business Innovation Centers and over 100 projects, has led to marketable ideas and solid business results. The company has performed exceptionally well in the areas of supply chain management, customer relationship management and human capital.
