Company Description

With sales and revenue of EUR 54 billion in 2016, the Groupe PSA designs unique automotive experiences and delivers mobility solutions that provide freedom and enjoyment to customers around the world. The Group has three car brands, Peugeot, Citroën and DS, as well as a wide array of mobility and smart services under its Free2Move brand, to meet the evolving needs and expectations of automobile users. Mindful of the key changes called for by the car of the future, the PSA Group's strategy for 2016 to 2021 aims to make the Group a global car manufacturer on the cutting edge of efficiency and a provider of mobility services favored by its customers. The automobile manufacturer PSA is the European leader in terms of CO2 emissions, with average emissions of 102.4 grams per kilometer in 2016, and has been an early innovator in the field of autonomous and connected cars, with 2.3 million such vehicles worldwide. It is also involved in financing activities through Banque PSA Finance and in automotive equipment via Faurecia.

Industry Drivers

The automobile industry is under extreme regulatory pressure, both in terms of performance and design. Furthermore, from the consumer perspective, fuel efficiency has developed into one of the main decision criterion when selecting an automobile. Innovation has become the cornerstone for building a company's long term success whether from simple engine enhancements or from radically new technologies like electric- and hybrid-powered vehicles. More often than not, innovation is spawned by increasingly demanding safety-technology expectations as well as by public focus on air pollution and climate change. This will only increase supply chain complexity and automobile manufacturers must carefully assess the terms of risks (e.g. critical suppliers & rare earth elements), and opportunities (e.g. material innovation & recycling) across the entire value chain. Finally, a robust corporate governance structure and compliance practices will be crucial to ensure compliance with environmental standards as well as to avoid future reputational and legal issues.

Sustainability Performance

PSA Group’s social and environmental policy is based on continuous dialogue with its stakeholders and the conviction that automotive sustainability can contribute to the creation of value for everyone. The policy is based on three pillars: a commitment to sustainable mobility, a societal commitment to the regions in which it operates, and a social commitment to enable employees to enhance and make full use of all their talents. The company pulled into the leadership position in the automobiles and components industry group with top performance in Innovation Management and Climate Strategy and significant improvements with respect to Labor Practices and Human Capital Development, all among the most material issues in the Automobile Industry.

Disclaimer: RobecoSAM continues to monitor global investigations into the manipulation of emissions testing results. RobecoSAM also acknowledges the ongoing cartel allegations in the German automobile industry and the implications this may have on companies, suppliers and customers. The above situation has been taken into account in the 2017 DJSI review and company scores have been downgraded according to RobecoSAM's rules and facts based assessment methodology. As per its Media & Stakeholder Analysis process, RobecoSAM reserves the right to make further adjustments to company scores, ranking and index inclusion as necessary.
