Atos SE leads the IT services & Internet Software and Services industry in RobecoSAM’s Corporate Sustainability Assessment based on its Total Sustainability Score in 2018. This report provides a broad overview of the performance of the IT services & Internet Software and Services industry and the relative positioning of Atos SE at the dimension and criteria level.

Industry Drivers

The IT services and internet software & services industry consists of companies that provide such things as online databases, web design and registration services. In addition, industry players develop and market internet software to help clients run their businesses more efficiently by outsourcing business processes or developing new software applications. Therefore, data privacy and security are priorities for customer satisfaction, attraction and retention, and in mitigating potential legal and reputational risks. To protect client privacy and secure information technology, a rigorously enforced code of conduct covering access to confidential data is required. Knowledge management and human capital development are important in developing new products and fostering innovation, so attracting and retaining qualified staff is critical. The industry’s main environmental impacts stem from data center operations where, in spite of increasing energy efficiency, the exponential growth of data volume is requiring companies to focus on energy and water efficiency.

Company Performance

RobecoSAM has selected the most relevant criteria in each sustainability dimension based on their weight in the assessment and their current or expected significance for the industry. The spider chart below visualizes the performance of the industry leader against the best score achieved in each criterion and the median industry score.

Corporate Sustainability Assessment

The RobecoSAM Corporate Sustainability Assessment (CSA) is a comprehensive annual evaluation of companies' sustainability practices and performance. Every March, RobecoSAM extends invitations to over 3,500 of the largest, listed companies globally to participate in the assessment by completing an in-depth questionnaire. Assessment results are published in September, following the analysis of companies' submissions complemented by additional research performed by RobecoSAM.

RobecoSAM's CSA is one of the longest standing ESG rating methodologies worldwide, dating back to 1999. The CSA assesses companies on the basis of 80 – 120 industry-specific questions across 60 industries focusing on financially material economic, environmental, and social factors that are relevant to companies' success, but that are under-researched in conventional financial analysis. Every year, the CSA undergoes rigorous methodological review in order to ensure that the most current material sustainability topics, as well as emerging, long-term sustainability themes often of interest to investors are reflected, and companies are challenged on topics that lack disclosure today.

The results of the CSA are used for the annual rebalancing of the iconic Dow Jones Sustainability Indices (DJSI) and are made available to investors, researchers, and non-governmental organizations through the Bloomberg Professional platform. The results of the CSA are also used for the creation of the RobecoSAM Sustainability Yearbook, one of the most comprehensive annual publications on corporate sustainability.
